FCS NetCentre & IP NetCentre

Dial-up and Wireless LAN in-room Internet access and billing solution

FCS NetCentre & IP NetCentre is another innovative add-on module for the FCS WinSuite that provides guests with in-room Internet access with the added convenience of receiving and checking messages from the same front end.

With integrated billing, Internet usage is automatically updated to the guest folio. It comes with a few charging formulas which provides the flexibility of charging the guests according to different methods. Guests are given a slip detailing how to access the Internet upon check in. It does not require any rewiring of cables. Hence, the whole solution is very simple to use and maintain.

Only the successful login user will be charged, depending on the hotel charging method:

- By Duration (Kilobytes)
- By Day
- By Check In
- By Extension Type (VIP guest or normal guest)

□ Feature List

- Interface with the hotel Front Office System and FCS WinSuite - Call Billing systems.
- Automatically create user name and password (upon Check-in from Front Office).
- Print the user name and password through serial printer.
- Use guest name field for Internet user indicator.
- Continuous on-line access.
- Delete the user name and password upon guest checkout.
- Internet charges on successful login user.
- Change user password from the Web Page.
- Retrieve log files through FTP.
- On line & real time update of internet charges to guest folio.
- Configurable to hotel's network printing.
